

“EAGLES-like” Part-of-Speech Tagset

The PoS-tagset used to annotate CORIS is designed according to the EAGLES guidelines [Monachini, 1995], one of the few agreed standard in the NLP community. In particular it is similar to the Level 1 of the morpho-syntactic classification proposed by Monachini.

As to the classification mismatches and the actual disagreement in assigning words to PoS classes, we relied on suggestions and instances mainly taken from the online version of the dictionary edited by De Mauro [2007].

This is the complete tag list:

Verbs	<i>V_AVERE</i>	All forms of verb <i>avere</i> .
	<i>V_ESSERE</i>	All forms of verb <i>essere</i> .
